

Increased Agility through Open Innovation

Steven Fraser
sdf@fraser.com
<http://www.linkedin.com/in/sdf/fraser>

Education

- PhD (EE): Software, CS, Physics
- University Governance & Management

Engineer & Architect

- BNR Computing Research Lab (CRL)
- Nortel Disruptive Technologies
- SEI Visiting Scientist (CMU)

Portfolio Manager

- Nortel Disruptive Technology Program
- Qualcomm Learning Center

Research & Innovation Leadership

- Cisco Research Center
- HP Global University Programs
- Innoxec – Innovation & Collaboration

Increased Agility through Open Innovation

Dennis Mandl
dmandl@acm.org
<http://mandlswx.com>

Education

- PhD (CS): Software
- lifelong learning in large and small software organizations

Technology Transfer experience

- Bell Labs – Software Technology Center
- C++ language, tools, and applications
- OO Design and Patterns, Requirements Models
- Legacy Software techniques
- Coaching agile development

Technical/Agile Portfolio

- OO Design Heuristics
- Agile practices for large companies
- Architecture in an Agile World

© 2020 Steven Fraser & Dennis Mandl

2

Part I: Innovation

3

Seminar Learning Objectives

- Increased awareness for value of:
 - open innovation
 - collaboration
- Share strategies and models for open innovation
 - context of company-university relations
- Increased understanding of mechanisms to foster and support company-university collaborations
- Increased agility for open innovation collaborations

© 2020 Steven Fraser & Dennis Mandl

4

Anticipated Audience

- Individuals looking to learn more about open innovation and strategies to leverage university technology and talent relationships
- University researchers and staff looking for strategies to increase engagement with companies to calibrate and collaborate
- Leaders seeking strategies to grow their innovation ecosystem

© 2020 Steven Fraser & Dennis Mandl

5

Innovation?

- *The process of translating an idea or invention into a product or service that creates value or for which customers will pay.*
- *To be labelled an innovation, an idea must be replicable at an economical cost and must satisfy a specific need.*

*Based on definition from BusinessDictionary.com
 © 2020 Steven Fraser & Dennis Mandl

6

Approaches to Innovation: Collaborative or Competitive?

Are you a Collaborative Leader? Herminia Ibarra and Morten Hansen, HBR, Jul - Aug 2011.

© 2020 Steven Fraser & Dennis Mand

7

Innovation Examples

Products & Services	Fabrication & Delivery Processes	Marketing & Delivery	Business Models & Organizations
<ul style="list-style-type: none"> • Improve • Integrate • New Technologies • ... 	<ul style="list-style-type: none"> • Faster • Cheaper • Better Quality • ... 	<ul style="list-style-type: none"> • Create Need • Influence Need • Satisfy Need • ... 	<ul style="list-style-type: none"> • Partnerships • Revenue Models • Off-shoring • ...

Frederick Taylor (1856-1915)

- Optimize **cost-of-acquisition**
- “Scientific Management”
- Train – supervise – measure

William Deming (1900-93)

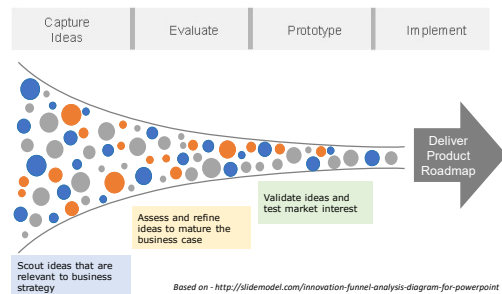

- Optimize **cost-of-ownership**
- Continuous improvement
- Cooperation/collaboration

© 2020 Steven Fraser & Dennis Mand

8

Innovation in the 19th and 20th Century: Cone of Commercialization

© 2020 Steven Fraser & Dennis Mand

9

21st Century Innovation

Global Innovation Chain:

- Intellectual Property – global governance
- Global talent – global mobility
- Searchable & Shareable – ideas, people, resources
- Libraries & Frameworks – simplify reuse & integration
- VC Funding – availability of “funding”

COVID-19

- Work-from-Home – Enforced by necessity
- Collaboration video* – WebEx, Skype, Zoom, ...
- Collaboration support – Slack, GitHub, Standards, ...
- Social change – Management, customers, etc.

*Being mindful to have “effective” meetings when necessary

© 2020 Steven Fraser & Dennis Mand

10

Open Innovation

© 2020 Steven Fraser & Dennis Mand

11

Traditional Innovation “Horizons”

Horizon	Innovation Focus
H1: 0-18 Months	Product Development
H2: 18-36 Months	Advanced Development
H3: >36 Months	R&D Innovation

The Alchemy of Growth, M. Baghai, S. Coley, D. White, 1999, NYC.

© 2020 Steven Fraser & Dennis Mand

12

Traditional Company Investments

Future: H3 Innovation ~10% Investment

- Create new capabilities and business models to disrupt markets and competition

Soon: H2 Innovation ~20% Investment

- Extend company's existing business models and capabilities to new customers and markets

Now: H1 Innovation ~70% Investment

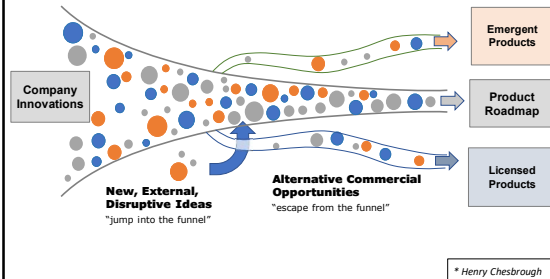

- Incrementally create new capabilities and leverage existing business models

McKinsey's Three Horizons Model Defined Innovation for Years.
Here's Why It No Longer Applies. Steve Blank, HBR, Feb 1, 2019

© 2020 Steven Fraser & Dennis Mandl

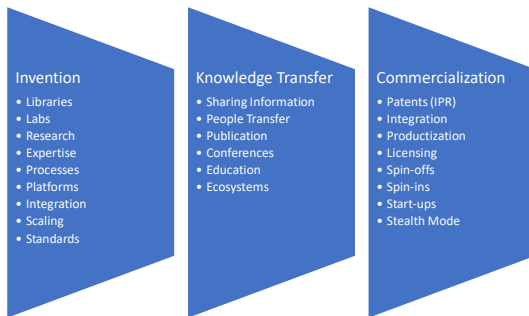

13

Open Innovation: An Agile "Leaky Funnel"*

14

Strategies for Commercializing Innovation

15

Modern Challenge: Responsible Innovation?

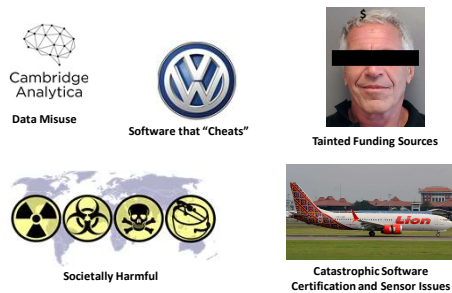

Address Questions of:

- Ethical acceptability
 - Sustainability
 - Societal desirability
- © 2020 Steven Fraser & Dennis Mandl

16

Examples: Non-Responsible Innovation

17

Part II:
Company -
University
Partnerships

18

Why Do Companies Engage Universities?

• Foster collaborations to accelerate innovation	IPR
• Expand company brand in research community	Attract talent
• Incubate a talent pipeline to grow capabilities	Attract talent
• Leverage regional & government incentives	Funding
• "Do Good" with universities, NPOs, NGOs, ...	Public relations
• Influence government policy	Business benefits

19

Why Do Universities Engage Companies?

• A chance to increase the impact of innovations	Tenure/IPR
• Build up a portfolio of publications	Tenure
• Opportunity for students to demonstrate skills	Talent Placement
• Access to resources	Funding
• Opportunity to deliver training/coaching services	Funding
• "Do Good" with companies	Public relations

20

Contrasting Motivations: Sponsor vs PI*

Sponsor/Company

- Exploration + IP + Acquisition + ROI
- Talent Acquisition (full-time/internships)
- Product Benchmarking
- Sales
- Brand Collateral
- Philanthropic Donor

Researcher/University

- Research Agenda
- Talent (Student) Development + Placement
- Industry Calibration + IP Revenue
- Publication
- Professional Development (Tenure)
- Philanthropic (Funding) Recipient

- PI = Principal Investigator (Researcher)
- IP = Intellectual Property
- ROI = Return on Investment

© 2020 Steven Fraser & Dennis Mand

21

21

Sample Government Innovation Catalysts

NSF (US)	- Industry-University Cooperative Research Centers Program
NIH (US)	- Academic-Industrial Partnerships for Translation of Technologies for Diagnosis and Treatment
NSERC (Canada)	- Collaborative Research and Development Grants
Horizon 2020 (EU)	- EU Framework Program for Research and Innovation Horizon Europe – latest € 100 B innovation program
ARC (Australia)	- Discovery Program

Incentives

26

26

Three Requirements to Manage “Effective Collaborations”

1. Database* of relationships

- List of PIs
- List of “Partners”
- List of Sponsors
- Contact information
- Funding/projects/outcomes
- List of Students/Admin Staff
- Publications created from collaborations

2. Assessments of outcomes

- Itemize the Value to the company or university (monetary and “in-kind”)

3. Transparency

Must have transparency in
“the process of creating
relationships and funding”

- Look out for duplication
- Look out for potential compliance issues

© 2020 Steven Fraser & Dennis Mandl

* Relationship Manager

27

27

“Jump Start” Collaborations

1. Scout for Partners and Resources

- Identify partners
- Identify funding sources

- “Invest”
 - company needs/provides?
 - university needs/provides?

2. Broker & Fund Relationships

3. Collaborate & Assess Outcomes

4. Share Learnings & Make Results Visible

© 2020 Steven Fraser & Dennis Mandl

28

28

Internal Conferences Build Community

*Internal to a company or university

Collaboration Strategies: Funding Models

	Research Consortia	Research Contracts	Expert Consulting	Gift/Donation Contracts	“Equipment” Donations	Chairs + Fellowships
Governance	Mix – Company, PI, University Guidelines	Subject to Contract Terms, University Guidelines	PI Employment + University Guidelines	Arm's length; University Guidelines	Arm's length; University Guidelines	Arm's length; University Guidelines
Project Selection	Center Selects from PI Proposals	Company Negotiates with PI/University	Company has close relationship with PI	Company Selects from PI Proposals	Company Initiatives + University Proposals	PI/Student; Department, Dept.; Company Proposal
Payments	Annual Fees	Specified by Payment Schedule	Specified by contract (hourly or project based)	Determined by Company	Determined by Company	Fee generally set by Department or University
Term	Flexible – Often Self-Renewing	Specified in Contract Terms	Specified in contract terms	Fixed term best (“1 Year)	Perpetuity or “loan”	Fellow – 1 yr; Chair – depends on University
Strengths	Critical Mass; Tech Sensing; IPR Access; Publicity; Goodwill; Tax Benefit	Tangible IPR Deliverables; Tax Benefit	PI/Consultant signs “employee agreement” for access and NDA	Exploration; Goodwill; Publicity; Overheads; Tax Benefit	Goodwill; Publicity; Benchmarking; Tax Benefit	Talent Development; Goodwill; Tax Benefit
Weaknesses	Expense; Lack of Influence on Project	Overhead costs; Negotiation time	Depends on University context; NDA issues	Arm's Length Nature of Relationship	Arm's Length Nature of Relationship	Lack of Tangible Results; Expense
Risks	Company IPR Contamination	Indemnification Issues; 3rd Party Rights	Indemnification Issues; 3rd Party Rights	Ethics; Tax Issues; Compliance + Overhead Issues	Ethics; Tax Issues; Compliance	Contractual Issues

PI = Principal Investigator
IPR = Intellectual Property Rights
NDA = Non-Disclosure Agreement

40

41

42

Use Cases (UC) for Company-University Collaboration

- Why Use Cases?
 - Describe the “actors” (participants)
 - Identify actor “goals”
 - Document a step-by-step scenario
 - Focus on interactions
 - Include some “alternative steps”
 - Consider “Rainy Day Scenarios”

Wine Case

© 2020 Steven Fraser & Dennis Mandl

43

Roles and Goals of UC* Collaboration Actors

Company Actors

- Engineers who want to leverage university research and talent to drive product innovation
- Company champions to evangelize and increase visibility/value of collaborations
- Knowledge transfer staff to facilitate “commercializing new knowledge”
- Company Business Leaders to assess and fund collaborations

University Actors

- Researchers looking to expand their world – to calibrate their research and identify corporate sponsors
- Students seeking internships and full-time opportunities
- Knowledge Transfer (IPR) Staff or “Collaboration Managers” to build and commercialize collaborations
- University Leaders looking to build (fund) for the future

UC = Use Case

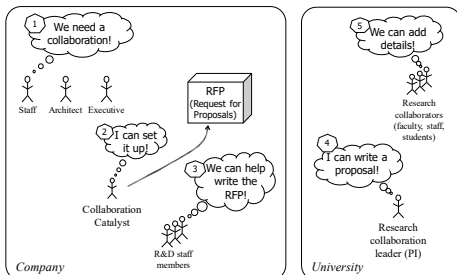

© 2020 Steven Fraser & Dennis Mandl

44

UC1: Company Initiated Project

One specific collaboration project

Trigger: A company makes a tactical decision to fund one specific research effort – with one partner (maybe already identified in advance)

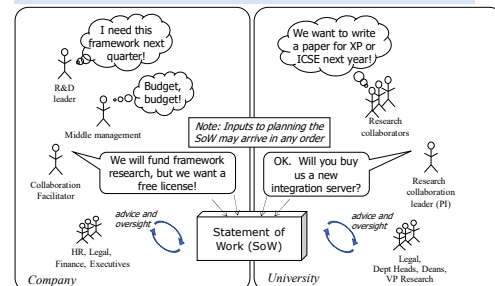

© 2020 Steven Fraser & Dennis Mandl

45

UC2: Tactical Research Collaboration

Trigger: Need to create a research contract = refine a “proposal” to a well-defined Statement of Work (next step after proposal is accepted)

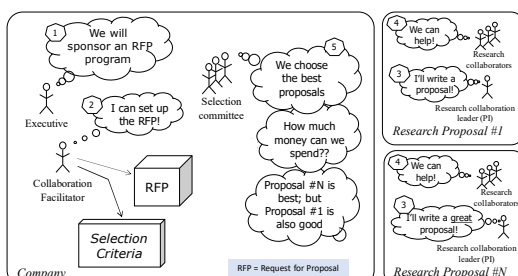

© 2020 Steven Fraser & Dennis Mandl

46

UC3: Strategic Proposal (RFP) Program

Wide-ranging collaboration program

Trigger: A decision to fund a wide-ranging collaboration program

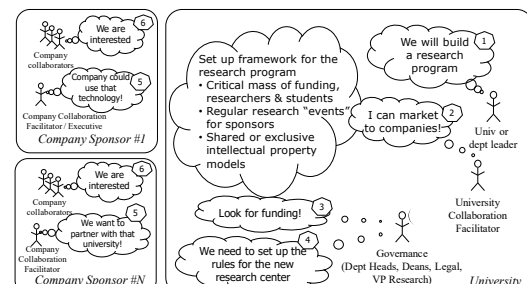

© 2020 Steven Fraser & Dennis Mandl

47

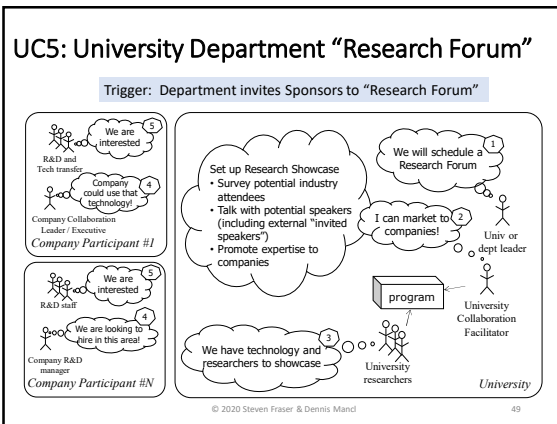

UC4: University “Consortia”

Trigger: University creates a “Center of Excellence” and seeks sponsors

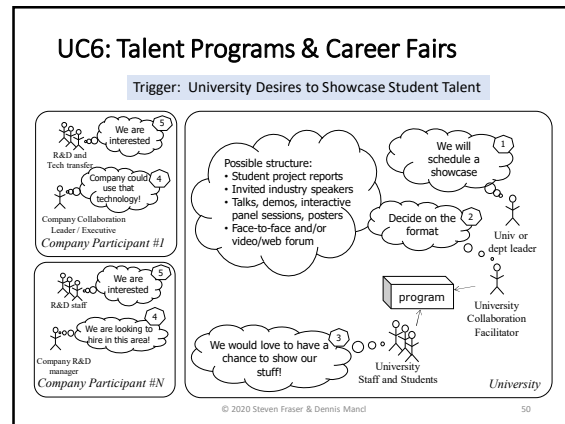

© 2020 Steven Fraser & Dennis Mandl

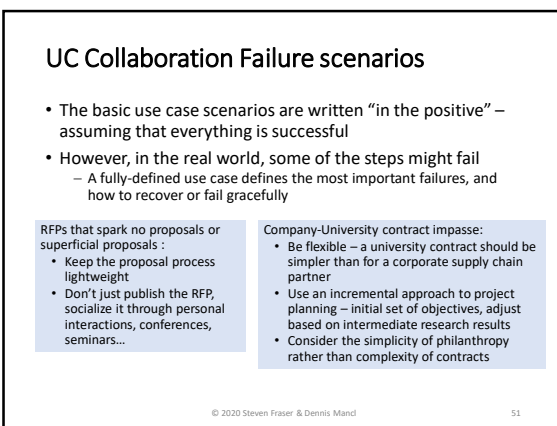

48

49

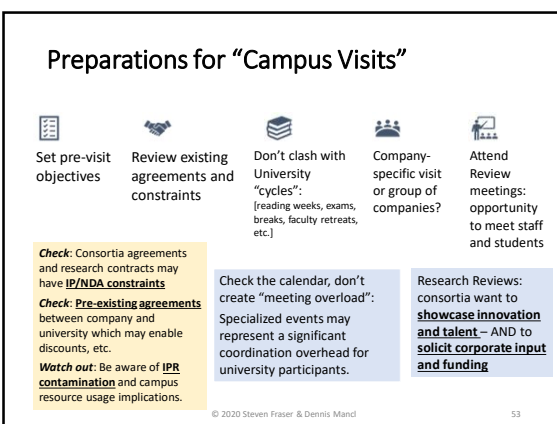

50

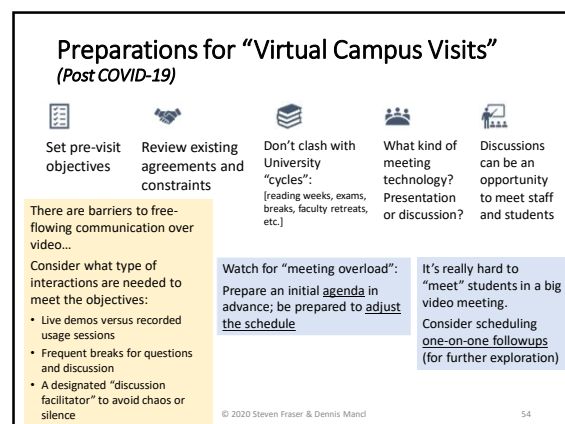

51

52

53

54

55

The Cost of Company Innovation

- Internal costs
 - Product Engineering
 - Research & Development
 - Staffing + Overheads + Infrastructure
- External costs
 - Innovation by acquisition (can be \$\$\$ billions)
 - Acquisition+ licensing of IPR owned by others
 - Outsourcing + off-shoring
 - University partnerships + Joint Ventures + etc.
 - Legal (patent + patent defense + infringement costs)

© 2020 Steven Fraser & Dennis Mand 56

56

The Cost of University Innovation

University “overhead rates” reflects cost of:

- Academic and administrative staff
- Buildings (heat, light, power, water, etc.)
- Labs and equipment
- IT Infrastructure
- Patent, patent defense, patent infringement

© 2020 Steven Fraser & Dennis Mand 57

57

“Hidden Costs?”

University research is not:

- “free”
- “low-cost”

Fine Print!

© 2020 Steven Fraser & Dennis Mand 58

58

University Overheads: Keeping the Lights On!

University	Overhead Rate %
Boston U	64
Columbia	60
Duke	57
Harvard	69
MIT	56
Penn State	49
Princeton	61
Stanford	57
UC Berkeley	56
U Mass Amherst	59
U Michigan	56
Wisconsin	50
Yale	66

University Overheads

- Administrative
- Heat
- Lights
- Power

Average = 60%

Based on Boston Globe 2013

59

Avoid Negative “Headlines”

Litton hits Nortel, JDS, others with fiber-optic patent suit

- Stanford University and Litton Systems Inc. filed the lawsuit in U.S. District Court in Los Angeles, alleging the 15 defendants have been infringing the patent by...
(Bloomberg News – Oct 6, 2000)

HP Hit with \$184 M Verdict in Cornell Patent Trial

- A federal jury in New York found Hewlett Packard Co. liable on Friday for years of infringement of a computer processor patent held by Cornell University and ordered the company to pay \$184 million in damages.
(Law 360 – Jun 2, 2008)

Apple + Intel Cases: Wisconsin University wins huge damages

- The Wisconsin Alumni Research Foundation, the patent licensing arm of the University of Wisconsin-Madison, said the verdict was important to guard its inventions from unauthorized use...
- The University of Wisconsin sued Intel over the same patent in 2008. That case was settled out of court for an undisclosed sum.
(BBC News – Oct 17, 2015)

74

Achieving Strategic New Business Impact

75

Cisco's PhD/Post-Doc Hiring Approaches

Role-Centric Recruiting

- Business has planned "must fill" role
 - Challenging to identify "right" candidate
 - Multiple candidates for one role
- Business identifies multiple candidates
 - Through referrals
 - PhD/Post-Doc candidate pool
 - Recruiter sourcing
- Business interviews candidates
 - Internal tech lecture
- Business selects candidate for offer

Talent-Centric Recruiting

- Candidates opportunistically identified by:
 - Company funded research
 - Referrals by professors, etc.
 - Conferences, campus visits, etc.
 - "Research Center" screens interviewees, matches to 3 roles (selected from Business role pool)
 - Business Managers vet candidate matches
 - Candidates visit Company
 - Tech lecture Interview with 3 teams
 - ~5 interviews/team
 - Candidates/Managers "match"
 - results in an offer to candidate
- © 2020 Steven Fraser & Dennis Mandl 76

76

"Long Tail" Company Funding by University

- Some universities may receive significant company funding as a result of:
 - Reputation and connections
 - Company proximity
 - Variety of programs (consortia, institutes, projects, etc.)
 - Other universities receive less funding (fewer projects funded)
- © 2020 Steven Fraser & Dennis Mandl 77

77

Support Innovation – Disseminate Ideas

- Develop performance objectives to incent, assess, reward collaboration & innovation outcomes, etc.
 - ↑ Create an incentive for individual employees to be part of a collaboration program
 - Spread new ideas internally: tech forums, learning programs, training, hackathons...
 - Foster communities of practice & interaction – connect, leverage, develop, retain senior talent, etc.
 - Help others learn from the collaboration program
 - Support agile iterative product planning (roadmaps), development, and deployment
- © 2020 Steven Fraser & Dennis Mandl 78

78

Grow Talent in your Organization

- Identify, leverage, recruit, and retain expertise through the collateral of research investments
- Encourage company experts to give university talks – and invite researchers to give company talks/demos
- Organize directed internships and sabbaticals that translate into full-time hires and long-term relationships

Use to help academics to "get to know you" – they might learn that there are interesting problems in industry!

Increase your company's reputation in the academic world...

© 2020 Steven Fraser & Dennis Mand

79

79

Increase Company's "Innovation" Branding

- Associate with top tier universities: research philanthropy, equipment donations, fellowships, chairs, etc.
- Influence policy and standards, benchmark prototypes, encourage open application development where relevant
- Leverage government programs (funding, regional development, etc.)
- Create visibility through conference sponsorship and participation, (joint) publications, standards, etc.

Improve your company's reputation!

Not just university – standards committees, government, conferences, ...

© 2020 Steven Fraser & Dennis Mand
